Accuratus Maximus - Mini Layout Multi Device Wireless Bluetooth® Keyboard with Scissor Keys

## About

The Accuratus Maximus Bluetooth® wireless mini keyboard is the ideal partner for your modern and sleek PC or Bluetooth® enabled tablet or device. It is a multi device wireless keyboard meaning you can pair this to up to 3 different devices all at the same time, perfect if you are hot swapping between your phone, tablet and PC. The 3 paired settings will be stored in the keyboard so when you are switching between devices, there is no need to re-pair to each unit, just press the dedicated multi device buttons (1,2 or 3) and you will be connected. It takes a matter of seconds once you have them paired.

This Bluetooth® keyboard has an excellent range of 10 metres, however has been proven to work in our labs at an even further distance! The Maximus is designed with style in mind including an ultra sleek stainless steel framed and bottom case. The Maximus keyboard has a mini layout, which means it has all the usual 'qwerty' and top number keys. The key caps are slim-line with a standard size and have great tactile feel with a scissor key mechanism so is a pleasure to type on. The Maximus even has an internal lithium rechargeable battery so you will never have to go out of your way to buy replacement battery.
