Accuratus AC103B - Professional IP65 Sealed Compact Touchpad Keyboard with Numeric Keypad and Scissor Keys

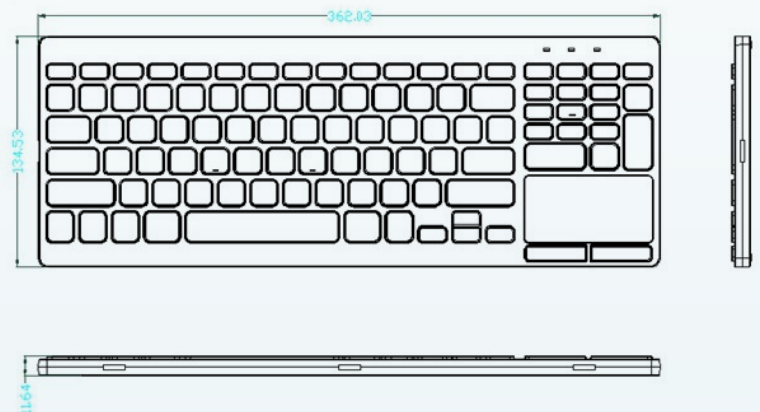

About

The Accuratus AC103B is a compact keyboard based on our K82B model but with the addition of a numeric keypad above the touchpad and a special sealed ruggedised silicone covering encasing the keyboard. It is designed specifically for industrial, medical, in-vehicle use and environments which are dusty, dirty and wet. The AC103B's keys although encased in silicone have a scissor key mechanism underneath and full plastic keycaps on top just underneath the silicone cover. This means the keys still very tactile for touch typing and they are extremely durable. The low profile ruggedised keys allow for simple and easy cleaning so to prevent any build up of dirt and germs.

The AC103B can withstand most things you throw at it, its made of a high quality material which offers the perfect combination of practicality, durability, comfort and flexibility. The AC103B is also ideal for many other situations; car garages, warehouses, workshops, factories. Laboratories, food environments, boats, the list goes on.
